Dock and Dumpster Wash

The Perfect Combination of Enzyme and Natural Citronella Oils!

Designed to deodorize odors in sewers, drain lines, elevator shafts, dumpster areas, garbage collection areas, or anywhere that strong undesirable odors are present.

Dock and Dumpster Wash is a Liquid Bacteria Hydrocarbon Degradar containing strains of microorganisms, selected for their synergistic qualities to biodegrade hydrocarbons. These microorganisms are selected for their performance under aerobic and anaerobic conditions.

This Enzymatic Hydrocarbon Degreaser contains surfactants to allow penetration into grease deposits and speed up the biological process. To ensure optimal performance, high potency nutrients and stimulants are added.

Dock and Dumpster Wash contains organisms that will degrade a wide range of hydrocarbons including: gasoline, diesel, crude oil, benzene, toluene, ethyl benzene, xylene as well as animal and vegetable fats and oils.

Dock and Dumpster Cleaner is designed to attack hydrocarbon waste as in grease and odor causing residue that is found in trash bins, drain lines, dumpsters and loading docks.

Dock and Dumpster Cleaner is fortified with Citronella to discourage flies and other pests as well as leave a pleasant scent.

Directions: For Routine Cleaning and Deodorizing of garage floors, concrete driveway, parking lots and other hard surfaces. Dilute 2 oz of concentrate per gallon of water. Spray surface evenly, scrub lightly with a broom and rinse.

For Use on Loading Docks and Dumpsters: Spray or Pressure wash at a dilution of 2 ounces per gallon on walls, inside container and over problem areas. Allow to dwell 5-10 minutes. Agitate with brush if necessary.

LAND-TEK MAINTENANCE, Inc.

An established source of custodial maintenance and paper products since 1972.
